

Does God arrange divine appointments at the Oaks? Recently a new associate to the Oaks mentioned that she helped distribute donated food from a local grocery store to those in need. One day when she found that she had made all her stops and still had many loaves of bread and buns left, she decided on a whim to stop at the Oaks and see if anyone here could use the food. At the same time a family that was in desperate need was here for material goods. The food was quickly transferred from one vehicle to another. Divine arrangement helped a family not only with supplies to care for young children but food too.
